Please volunteer for the Arkansas Donated Dental Services Program to help us ensure that needy Arkansans are able to receive dental services.

What is the Donated Dental Services program?
We help underserved Arkansans receive dental care through the commitment of Arkansas dental professionals and labs who donate their time and services. Many recipients have dental problems which require dentures, crowns or bridges. These appliances are usually donated by dental laboratories.

Applicants go through a strict approval process to determine their need in order to receive services. Currently, patients experience a long wait time due to the lack of volunteers.

We need YOU!

Volunteer Dental Professionals and Labs
As a volunteer dental professional, you will:
• Review the patient’s profile in advance
• Choose to accept or decline any patient
• See patients in your own office
• Never pay lab costs
• Not complete any extra paperwork

Benefits of Volunteering
As a volunteer dental professional, you will:
• Receive recognition for participating in the program
• Help foster good public relations for helping the needy in your community
• Help recipients reap positive health benefits such as combating depression, decreasing blood pressure and increasing self esteem
• Help spread generosity. The more you do for others the more people will follow your lead!
• Receive a personal sense of accomplishment for donated services
